

## NON-WOVEN AND VINYL WALLPAPER CARE RECOMMENDATIONS

If you keep the non-woven and vinyl wallpapers on a non-woven basis in good condition, this will extend their service life. As a rule, there is nothing complicated in the care itself. Dust can be removed with a vacuum cleaner, and cleaned with a dry brush.

Wallpapers can be washed with a cloth soaked in water or in a soap solution. Due to the wet cleaning coverings will be in good condition.
